

# Why SciFlow?

## Your Partner in Performance and Compliance

SciFlow is a cutting-edge platform designed to simplify tracking and reporting for Ministry-funded institutions and beyond. Built on the success of a custom solution for the Croatian Veterinary Institute (CVI), SciFlow delivers:

- **Seamless KPI Tracking:** Monitor scientific publications, project milestones, and collaborations in real-time.
- **Funding Compliance:** Ensure transparency with precise budget tracking and reporting.
- **Dabar Integration:** Publish research directly to Croatia's national repository.
- **Sky.Flow Power:** Leverage advanced DMS and BPM for automated workflows and secure data management.

## Proven Success

### Transforming Operations at CVI

SciFlow was developed on use-cases of commercial sector companies and built upon the success-story for the Croatian Veterinary Institute (CVI), enabling efficient tracking of scientific, national, and economic activities over a four-year funding period (2024–2027).

As CVI noted:

“

**Sciomagis developed a program that continuously monitors the achievement of specific goals and activities of scientists, along with tracking financial resources.**

SciFlow's intuitive dashboards and secure protocols streamlined CVI's compliance and performance, making it a trusted solution for Ministry-funded institutions.

# Meet Ministry Goals

## Tailored for Ministry Requirements

SciFlow supports institutions funded by the Ministry of Science and Education, addressing key priorities such as:

Increasing participation in competitive project funding

Strengthening international scientific collaboration

Enhancing research infrastructure and interdisciplinarity

Promoting applied research and industry partnerships

Driving digitalization and science popularization

Internationalizing project results and supporting national initiatives

# Universal Applicability

## Beyond Science: A Solution for All

SciFlow isn't just for scientific institutions. Its versatile features support:

### Project Budget Monitoring

Real-time expenditure tracking.

### IoT Integration

Monitor equipment performance and maintenance.

### Employee Tracking

Ensure compliance with workforce regulations.

### Scalable Design

Cloud or on-premise, tailored to your needs.

“  
**SciFlow is more than a tool – it's a strategic partner.**

Davorin Anton Dumančić, Director, Sciomagis

# Take Action Today!
